

Biotech Products Services & Research is a worldwide biotechnology company. Founded in 2011 and based out of Florida, we specialize in the discovery, development and dispatch of cellular disease management protocols for treating neurodegenerative, inflammatory and autoimmune conditions for patients all over the world.

1. ABOUT US

We are a publicly traded biotech company, focusing our efforts on cellular therapies and allografts. A dedication to innovation makes us trailblazers in the use of Cell management for diseases, cancer, inflammations and other conditions. We focus on disease management, and maintain a network of physicians in the United States and elsewhere who have all been trained thoroughly in our methods. BPSR also markets cellular products to doctors and hospitals worldwide, and has several patents pending that make use of those products for anti-aging, regeneration and cosmetics.

BPSR sells cellular based products made for medical, anti-aging and cosmetic purposes. We have a patient referral network, which allows patients to be treated for various medical conditions within our own network of doctors.

Cellular disease management service is provided to individual patients by their physician, where as many other products are sold all over the world in clinics, hospitals, spas and retail stores.

2. KEY FACTS

- Rapidly expanding company focusing on the development and clinical application of inventive cell-based therapeutics in the US.
- Capable and highly committed specialists working in the science and medical fields, governed by the reverence human life and health.
- Cell management product contract manufacturer dedicated to maintaining potent expertise and knowledge.

We aim to be the leader in the industry of innovative cell-based therapeutics with our platform, which will guide a future of customized disease management and medicine that change the outcomes of disease and the face of medicine as we know it.

We deliver cell based products safely, effectively and accurately to Physicians.

Fundamentally, our aim is to create safer and more efficient management protocols to face unaddressed and unfulfilled needs within the medical community, while generating high value for our shareholders. Our portfolio is dedicated to the same – opportunities that consider elevation from the current standard of care, innovative products in development and more.

By applying our own skills and technology, minimizing risk and expenditure, we have solidified our business strategy.

3. WE AIM TO:

- Focus our varied portfolio of cellular therapeutic products with a strong consideration for cost effectiveness, instead of focusing on a single opportunity;
- Create high quality products that are patently safer and more effectual than current products, made with consideration for unmet medical needs;
- Align ourselves with excellent partners, like leading research centers, clinical institutions and commercial partners to intensify our endeavors and help to enable our fiscal efficiency;
- Use our vast pooled experience and innovation to reduce development risk, time and expenditure.

Our cell management platform is specifically developed to aid in the management of various diseases that span cardiovascular, neurological, inflammatory and immune disease areas. As a small company entering such a broad field with so many opportunities, we face certain challenges. However, using several approaches, we aim to be efficient with our resources as we explore and develop all of the opportunities available to us.

4. PARTNERSHIP

BPSR has a constantly flourishing network of partners from academia, clinics and industry in order to take advantage of highly diverse knowledge and experience

in developing innovating cell therapies. We cultivate an environment of integrity and professionalism when it comes to both partners and clients, and privacy and security of their data and property is our highest priority.

5. MISSION

BPSR is dedicated to the study and development of autologous cellular therapies that will treat numerous degenerative diseases, as well as advancing our current research into the treatment of neurological, cardiovascular and peripheral vascular diseases.

Our customers are people who are looking to better their lives with more than what the standard medical industry has to offer. In accordance with our commitment to safety, we provide education along side the science needed so they can make the best decision for them regarding our therapies. Once these customers become a part of our network, we support them with organic products and monthly email news that will better their quality of life.

We are wholly committed to aiding those with severe diseases and conditions learn more about patientspecific, innovative cellular therapy. Cosmetically, we believe our scientifically proven product to be the first live cellular good on the market that may help improve skin.

5. OUR VALUES

Stringent Science: We are serious about our research and scientific methods, emphasizing accuracy in testing hypotheses and evaluating the potential of our products to better treat severe medical conditions.

Cooperation: We firmly believe that our success is tied to collaboration and teamwork, and encourage both employees and outside experts to aide and motivate one another in order to achieve our best work.

Tenacity: We understand that no goals are without their obstacles, and that's why we emphasize perseverance, hard work and problem solving when faces with obstacles.

Transparency: Having the trust of the community at large is very important to us, which is why we seek to be clear and communicative, updating patients, employees and shareholders on our findings and activities.

Integrity: We work on a strong basis of mutual trust that allows us to make decisions that are in the best interest of those at every level of our organization.

Responsibility: We insist on accountability, both personally and as an organization, with every action we take. In this way, we use our resources wisely, make mindful decisions and implement those decisions in an efficient manner.

6. OUR VISION

BPSR's focus is developing, manufacturing and supplying modern cell-based therapeutics to help treat conditions that lack solid therapeutic assistance. We apply only the highest standards when we produce our cell therapy products, always considering quality and safety above all else. BPSR's mantra is innovation. Our team works tirelessly to improve therapeutic strategies and to develop inventive therapy approaches. We aim to close the chasm that exists between research and clinics, making novel cell therapeutics available to patients and clinicians in the shortest time possible. At the

core of our values is the well-being of every patient, and we are guided by a deep respect for human life and health.

7. PRODUCTS AND SERVICES

We focus the majority of our efforts in cellular therapies. We cater to patients who suffer from conditions and diseases such as COPD, osteoarthritis, kidney disease, heart disease and more.

BPSR maintains a strategic relationship with Bioregen Cancer Center in Montego Bay Jamaica.

We currently market registered cellular products and human allografts used in the treatments for osteoarthritis, ophthalmic conditions and others.

We are prepared to file patents for cosmetic cellular products that will be available to physicians and consumers alike.

We uphold a strategic alliance with a firm, which helps connect personal injury patients to our network of physicians.

MANAGEMENT TEAM

Albert MITRANI

CEO and Chairman of the Board
